

Report of Invenia ABUS Workshops

May 25, 2017, Cordoba, Argentina

Invenia ABUS – SORDIC Congress

Background:

To increase the awareness of the Invenia ABUS system among the medical Community in Argentina, we agreed with the “Sociedad de Radiología de Cordoba” a series of three workshops with ABUS workstation within the XVI International Congress of Diagnostic Imaging of Cordoba.

Activities:

Three, one-hour length workshops were announced and all four workshops were sold-out at the second week of the announcement (30+ doctors/workshop) for a total of almost 100+ participants that were exposed to the information about the system, clinical evidence, justification and explanation of its functionality and place in a womens health imaging center workflow. Seven cases were selected for review. Four local radiologist and the applications, sales and service Teams from local channel partner, Intec, were trained in the WS the day prior to the workshops. Weeks before the activity, remote support from Global ABUS Team was received to download the demo software.

Dr. Edwin Cruz addressing the participants of the workshop.

Partial view of participants.

Each group of three participants shared a computer.

A total of 6-7 cases were reviewed and discussed.

Four workshops were celebrated to full capacity.
